

Craig E. Tamlyn, PE
Structural Engineer

EDUCATION

Michigan Technological University - BSCE & MSCE

REGISTRATION

Michigan Professional Engineer
Colorado Professional Engineer

PROFESSIONAL EXPERIENCE

Craig began practicing structural engineering in 1999 after completing his graduate work at Michigan Technological University. He worked for a structural engineering firm in Denver for four years as a design engineer. In 2003, Craig moved back to Michigan and began working for JDH Engineering. He has been project engineer on numerous projects, including multi-residential, commercial, educational, medical, and industrial facilities. An area of particular focus in Craig's engineering is the design of post tensioned concrete structures.

PROFESSIONAL AFFILIATIONS

American Institute of Steel Construction AISC
American Society of Civil Engineers ASCE
Precast/Prestressed Concrete Institute PCI
Structural Engineers Association of Michigan SEAMi

RESPONSIBILITIES

In his role as project engineer, Craig is a first line liaison with the client through the design and construction process. He is responsible for development of the structural system and its interface with other design disciplines, coordination of the preparing of structural contract documents, and contract administration.
