

**Douglas G. Petteys**  
Technical Support

**EDUCATION**

Oakland University - BA

**PROFESSIONAL EXPERIENCE**

Doug began structural drafting by hand in 1985 and continues to follow advancing technology through various AutoCad releases and now Revit/Building Information Modeling. Originally from the Detroit area, Doug worked on such retail projects as Great Lakes Crossing, the Somerset Collection, and numerous mall renovations. He also worked on a number of additions to the William Beaumont Hospital campuses including a Power Plant, Parking Deck, and the South Tower. Recent projects include Grand Valley State University Housing, Christ Memorial Reformed Church, and the new Elementary and Middle Schools for Kalamazoo Public Schools.

**RESPONSIBILITIES**

Doug's focus is creating a final product which is a complete set of structural drawings in electronic and print form to serve as contract bid documents. Coordinating between other disciplines, clients, and our own efforts for accuracy and consistency is very important to Doug. Doug maintains a central role in developing interfaces between analytical and drafting software as an integrated process.
